## **DEEP LEARNING ENGINEER**

Would you like to turn terabytes of images into data to make safe and healthy buildings?

OCTO is looking for Deep learning Engineers who develop software and algorithms for object detection, scene analysis, tracking and segmentation to run in a cloud environment as well as on embedded devices using deep learning techniques

Contribute to cross-team efforts to advance the state of the art of algorithms and software for building maintenance and healthy buildings.

In a typical week, you'll develop new features with state-of-the-art technologies in a cross-functional team of product managers, front-end developers and quality engineers.

This position is based in the Hague

### **You can...**

- Solve problems in a fast-paced, technical environment.
- Work in a multi-disciplined team where you'll take full ownership of turning discoveries and ideas into machine learning models.
- Write understandable, testable code with an eye towards maintainability.
- Challenge ideas and methods while working together with talented, highly skilled team members.
- Get excited from new technologies, adapt quickly and take ownership of your work.

### **Your skills**

- 2+ years of relevant work experience
- Education in a quantitative field (Computer Science, Mathematics, Engineering, Artificial Intelligence, etc.)
- Experience with at least one scripting language, e.g. R, Octave, and one programming language, e.g. Python, Perl, C/C++, Java

### **The offer**

- Excellent working conditions with a good salary
- The possibility for growth
- A great team to work in
- Room for learning

## About Octo

OCTO is more than just a tech company. We're on a mission to make buildings healthy, safe and comfortable. We're a team of 12 entrepreneurial people. Empathy, Ownership, Craftsmanship, Playfulness, Solidarity and Entrepreneurship. These are some of the core values we live by, as a company. We work by them too! We're building a platform and products we believe in. Knowing there is real value to be gained from digitalizing buildings. If you believe that as well, we're looking for you!
